

*The Original*

# GOURMET

C O O K E R

The perfect wood burning heater / cooker.  
Large space heating capacity and responsive  
cooking hot plate and oven.

The Gourmet has excellent heating ability without sacrificing the features required for a good cooking stove, such as a large cook top surface and a large glass fronted, self cleaning oven with thermometer. The top and bottom air vents provide responsive control over fire and oven temperatures. Available with two size water booster wetbacks for heating the domestic hot water, or with a factory fitted boiler to provide both domestic hot water as well as hydronic central heating circulating through under floor heating coils or responsive wall mounted radiators.

#### **Dimensions**
